

Epoxy floor coatings from Renobuild Ireland

An epoxy coating from Renobuild Ireland is the best way to get the floor that will do the best job for you. We offer self-smoothing, pigmented, epoxy resin floor coatings with a wide range of qualities and colours to meet the demands of most types of business. Some specific coatings have the benefit of having a high resistance to chemicals, being non-slip, flexible, self-levelling or extra tough for fork-lift traffic.

Renobuild has over 15 years experience in applying epoxy coatings to floors in a range of environments all over Ireland. We are right up-to-date on the mechanical and chemical requirements of most industry sectors.

Industries that often use these synthetic resin surfaces include textiles, plastics, garages, food, chemical, wholesale, transport, automotive, pharmaceutical, electronics, printing, kitchens (hotels, restaurants, bars, etc.), offices and schools. However, as well as being a tough, working surface, recent research has shown that your floor is seen as an indication of the quality of your company. Particularly in any DIY establishment, a high quality, attractive floor is extremely important for encouraging sales.

“We are keen to get under your feet”

Key features of an epoxy resin floor

A smooth surface without joints makes it easy to clean and maintain.

Can be made non-slip by the addition of aggregate (as above)

It's tough enough for forklift traffic.

Resistant to most common chemicals, fats, oils, etc

Excellent bonding characteristics enable it to be laid on new or existing concrete.

Attractive, decorative and available in a wide range of colours

Not all features apply to all resins.
